

EUROArray: Innovative microarrays for molecular genetic diagnostics (IVD)

- Multiplex analyses using EUROArray technology
- Simple test performance with ready-to-use reagents
- High result security due to various integrated controls
- Direct use of EDTA blood with EUROArray Direct: no separate DNA isolation required
- Fully automated standardised evaluation

| PARAMETER | INDICATION |
|-------------------------------|---|
| APOE* | Alzheimer's disease |
| Factor V/Factor II/MTHFR* | Thrombosis/thrombophilia |
| HFE* | Haemochromatosis |
| HLA-B27* | Ankylosing spondylitis (Bechterew's disease) |
| HLA-B57:01* | Abacavir hypersensitivity |
| HLA-Cw6* | Psoriasis |
| HLA-DQ2/DQ8* | Celiac disease (sprue) |
| Lactose/Fructose intolerance* | Lactose/fructose intolerance |
| Dermatomycosis | Detection of dermatomycosis-causing pathogens |
| HPV | HPV detection / typing for cancer prevention |
| STI | Sexually transmitted infections |
| NEW: HSV1/2 VZV | Herpes infections |

*Available as EUROArray Direct
